Sustainable Resource Development

Gary M. Zatzman

Sustainable Resource Development Gary M. Zatzman

"True sustainability" is the line of engineering research and practice that is giving rise to a series of Scrivener textbooks, such as Khan & Islam's best-selling *The Greening of Petroleum Operations*. Making explicit reference to his own recently-published book in this series, *Sustainable Energy Pricing*, as the companion volume of this book, the author applies the principles of true economic sustainability developed there to re-examine actual engineering practices in fossil fuel and as well as alternative-energy (such as wind and tidal power) exploration and development.
