Lectures on Elliptic Curves (London Mathematical Society Student Texts, Vol. 24) J. W. S. Cassels The study of special cases of elliptic curves goes back to Diophantos and Fermat, and today it is still one of the liveliest centers of research in number theory. This book, addressed to beginning graduate students, introduces basic theory from a contemporary viewpoint but with an eye to the historical background. The central portion deals with curves over the rationals: the Mordell-Wei finite basis theorem, points of finite order (Nagell-Lutz), etc. The treatment is structured by the local-global standpoint and culminates in the description of the Tate-Shafarevich group as the obstruction to a Hasse principle. In an introductory section the Hasse principle for conics is discussed. The book closes with sections on the theory over finite fields (the "Riemann hypothesis for function fields") and recently developed uses of elliptic curves for factoring large integers. Prerequisites are kept to a minimum; an acquaintance with the fundamentals of Galois theory is assumed, but no knowledge either of algebraic number theory or algebraic geometry is needed. The p-adic numbers are introduced from scratch. Many examples and exercises are included for the reader, and those new to elliptic curves, whether they are graduate students or specialists from other fields, will find this a valuable introduction.

From reader reviews:

Detra Satterwhite:

What do you think of book? It is just for students because they're still students or this for all people in the world, exactly what the best subject for that? Only you can be answered for that query above. Every person has distinct personality and hobby per other. Don't to be forced someone or something that they don't need do that. You must know how great in addition to important the book Lectures on Elliptic Curves (London Mathematical Society Student Texts, Vol. 24). All type of book is it possible to see on many methods. You can look for the internet sources or other social media.

Billie Gould:

Nowadays reading books be a little more than want or need but also become a life style. This reading addiction give you lot of advantages. The benefits you got of course the knowledge the particular information inside the book in which improve your knowledge and information. The data you get based on what kind of reserve you read, if you want get more knowledge just go with knowledge books but if you want feel happy read one together with theme for entertaining for instance comic or novel. The Lectures on Elliptic Curves (London Mathematical Society Student Texts, Vol. 24) is kind of reserve which is giving the reader erratic experience.

Phillip Darrah:

Information is provisions for anyone to get better life, information nowadays can get by anyone in everywhere. The information can be a expertise or any news even a problem. What people must be consider when those information which is within the former life are challenging be find than now is taking seriously which one would work to believe or which one often the resource are convinced. If you find the unstable resource then you buy it as your main information we will see huge disadvantage for you. All of those possibilities will not happen in you if you take Lectures on Elliptic Curves (London Mathematical Society Student Texts, Vol. 24) as your daily resource information.

Jose Roberts:

Do you really one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Attempt to pick one book that you never know the inside because don't determine book by its cover may doesn't work at this point is difficult job because you are afraid that the inside maybe not since fantastic as in the outside seem likes. Maybe you answer is usually Lectures on Elliptic Curves (London Mathematical Society Student Texts, Vol. 24) why because the great cover that make you consider with regards to the content will not disappoint you. The inside or content will be fantastic as the outside as well as cover. Your reading 6th sense will directly make suggestions to pick up this book.
