Alpha Centauri: Unveiling the Secrets of Our Nearest Stellar Neighbor (Astronomers' Universe)

Martin Beech

As our closest stellar companion and composed of two Sun-like stars and a third small dwarf star, Alpha Centauri is an ideal testing ground of astrophysical models and has played a central role in the history and development of modern astronomy?from the first guesses at stellar distances to understanding how our own star, the Sun, might have evolved. It is also the host of the nearest known exoplanet, an ultra-hot, Earth-like planet recently discovered.

Just 4.4 light years away Alpha Centauri is also the most obvious target for humanity's first directed interstellar space probe. Such a mission could reveal the small-scale structure of a new planetary system and also represent the first step in what must surely be humanity's greatest future adventure?exploration of the Milky Way Galaxy itself.

For all of its closeness, α Centauri continues to tantalize astronomers with many unresolved mysteries, such as how did it form, how many planets does it contain and where are they, and how might we view its extensive panorama directly?

In this book we move from the study of individual stars to the study of our Solar System and our nearby galactic neighborhood. On the way we will review the rapidly developing fields of exoplanet formation and detection.

From reader reviews:

Robert Haas:

Inside other case, little individuals like to read book Alpha Centauri: Unveiling the Secrets of Our Nearest Stellar Neighbor (Astronomers' Universe). You can choose the best book if you like reading a book. Providing we know about how is important any book Alpha Centauri: Unveiling the Secrets of Our Nearest Stellar Neighbor (Astronomers' Universe). You can add understanding and of course you can around the world by just a book. Absolutely right, because from book you can understand everything! From your country until finally foreign or abroad you will find yourself known. About simple issue until wonderful thing you could know that. In this era, we are able to open a book or searching by internet system. It is called e-book. You should use it when you feel fed up to go to the library. Let's examine.

George Conner:

What do you with regards to book? It is not important with you? Or just adding material when you really need something to explain what the one you have problem? How about your time? Or are you busy particular person? If you don't have spare time to try and do others business, it is give you a sense of feeling bored faster. And you have free time? What did you do? All people has many questions above. They need to answer that question mainly because just their can do this. It said that about guide. Book is familiar on every person. Yes, it is suitable. Because start from on jardín de infancia until university need this Alpha Centauri: Unveiling the Secrets of Our Nearest Stellar Neighbor (Astronomers' Universe) to read.

Kim Adams:

Do you have something that you like such as book? The guide lovers usually prefer to choose book like comic, small story and the biggest the first is novel. Now, why not seeking Alpha Centauri: Unveiling the Secrets of Our Nearest Stellar Neighbor (Astronomers' Universe) that give your fun preference will be satisfied by simply reading this book. Reading addiction all over the world can be said as the method for people to know world considerably better then how they react to the world. It can't be stated constantly that reading behavior only for the geeky man but for all of you who wants to end up being success person. So , for all of you who want to start studying as your good habit, you could pick Alpha Centauri: Unveiling the Secrets of Our Nearest Stellar Neighbor (Astronomers' Universe) become your starter.

Kathryn Hebert:

Would you one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Aim to pick one book that you just dont know the inside because don't determine book by its handle may doesn't work the following is difficult job because you are frightened that the inside maybe not while fantastic as in the outside appear likes. Maybe you answer can be Alpha Centauri: Unveiling the Secrets of Our Nearest Stellar Neighbor (Astronomers' Universe) why because the excellent cover that make you consider concerning the content will not disappoint a person. The inside or content is fantastic as the outside

or cover. Your reading 6th sense will directly assist you to pick up this book.
