Iris Biometric Model for Secured Network Access

Franjeh El Khoury

Iris Biometric Model for Secured Network Access Franjeh El Khoury

In the last few years, biometric techniques have proven their ability to provide secure access to shared resources in various domains. Furthermore, software agents and multi-agent systems (MAS) have shown their efficiency in resolving critical network problems.

Iris Biometric Model for Secured Network Access proposes a new model, the IrisCryptoAgentSystem (ICAS), which is based on a biometric method for authentication using the iris of the eyes and an asymmetric cryptography method using "Rivest-Shamir-Adleman" (RSA) in an agent-based architecture. It focuses on the development of new methods in biometric authentication in order to provide greater efficiency in the ICAS model. It also covers the pretopological aspects in the development of the indexed hierarchy to classify DRVA iris templates.

The book introduces biometric systems, cryptography, and multi-agent systems (MAS) and explains how they can be used to solve security problems in complex systems. Examining the growing interest to exploit MAS across a range of fields through the integration of various features of agents, it also explains how the intersection of biometric systems, cryptography, and MAS can apply to iris recognition for secure network access.

The book presents the various conventional methods for the localization of external and internal edges of the iris of the eye based on five simulations and details the effectiveness of each. It also improves upon existing methods for the localization of the external and internal edges of the iris and for removing the intrusive effects of the eyelids.

From reader reviews:

Barry Phelan:

Information is provisions for anyone to get better life, information nowadays can get by anyone with everywhere. The information can be a knowledge or any news even an issue. What people must be consider when those information which is inside the former life are challenging to be find than now's taking seriously which one would work to believe or which one the particular resource are convinced. If you obtain the unstable resource then you buy it as your main information it will have huge disadvantage for you. All of those possibilities will not happen in you if you take Iris Biometric Model for Secured Network Access as your daily resource information.

Robert Perkins:

Reading a reserve tends to be new life style within this era globalization. With reading you can get a lot of information that may give you benefit in your life. With book everyone in this world can share their idea. Books can also inspire a lot of people. A great deal of author can inspire all their reader with their story or their experience. Not only the storyplot that share in the textbooks. But also they write about the knowledge about something that you need example. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors on this planet always try to improve their expertise in writing, they also doing some exploration before they write to the book. One of them is this Iris Biometric Model for Secured Network Access.

Jaime McKenney:

The guide with title Iris Biometric Model for Secured Network Access has lot of information that you can understand it. You can get a lot of profit after read this book. This book exist new information the information that exist in this guide represented the condition of the world right now. That is important to yo7u to understand how the improvement of the world. This specific book will bring you inside new era of the internationalization. You can read the e-book on the smart phone, so you can read this anywhere you want.

Kelly Jackson:

As a student exactly feel bored for you to reading. If their teacher expected them to go to the library or make summary for some publication, they are complained. Just small students that has reading's internal or real their passion. They just do what the teacher want, like asked to the library. They go to there but nothing reading critically. Any students feel that reading is not important, boring and can't see colorful pics on there. Yeah, it is for being complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Iris Biometric Model for Secured Network Access can make you experience more interested to read.
