Aquananotechnology: Global Prospects

Aquananotechnology: Global Prospects

The world's fresh water supplies are dwindling rapidly?even wastewater is now considered an asset. By 2025, most of the world's population will be facing serious water stresses and shortages.

Aquananotechnology: Global Prospects breaks new ground with its informative and innovative introduction of the application of nanotechnology to the remediation of contaminated water for drinking and industrial use. It provides a comprehensive overview, from a global perspective, of the latest research and developments in the use of nanotechnology for water purification and desalination methods.

The book also covers approaches to remediation such as high surface area nanoscale media for adsorption of toxic species, UV treatment of pathogens, and regeneration of saturated media with applications in municipal water supplies, produced water from fracking, ballast water, and more. It also discusses membranes, desalination, sensing, engineered polymers, magnetic nanomaterials, electrospun nanofibers, photocatalysis, endocrine disruptors, and Al₁₃ clusters. It explores physics-based phenomena such as subcritical water and cavitation-induced sonoluminescence, and fog harvesting.

With contributions from experts in developed and developing countries, including those with severe contamination, such as China, India, and Pakistan, the book's content spans a wide range of the subject areas that fall under the aquananotechnology banner, either squarely or tangentially. The book strongly emphasizes sorption media, with broad application to a myriad of contaminants?both geogenic and anthropogenic?keeping in mind that it is not enough for water to be potable, it must also be palatable.

From reader reviews:

Tyrone Knudson:

Book is to be different for every single grade. Book for children until adult are different content. As we know that book is very important for people. The book Aquananotechnology: Global Prospects was making you to know about other knowledge and of course you can take more information. It is rather advantages for you. The book Aquananotechnology: Global Prospects is not only giving you more new information but also for being your friend when you feel bored. You can spend your personal spend time to read your e-book. Try to make relationship with the book Aquananotechnology: Global Prospects. You never truly feel lose out for everything in the event you read some books.

Joseph Williams:

Reading a guide can be one of a lot of task that everyone in the world enjoys. Do you like reading book consequently. There are a lot of reasons why people enjoy it. First reading a guide will give you a lot of new facts. When you read a guide you will get new information mainly because book is one of a number of ways to share the information or maybe their idea. Second, reading through a book will make anyone more imaginative. When you reading through a book especially hype book the author will bring you to definitely imagine the story how the people do it anything. Third, you may share your knowledge to some others. When you read this Aquananotechnology: Global Prospects, you may tells your family, friends and soon about yours reserve. Your knowledge can inspire average, make them reading a reserve.

Michael Trejo:

Reading a book to be new life style in this calendar year; every people loves to examine a book. When you go through a book you can get a great deal of benefit. When you read books, you can improve your knowledge, simply because book has a lot of information in it. The information that you will get depend on what kinds of book that you have read. If you wish to get information about your analysis, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, these us novel, comics, as well as soon. The Aquananotechnology: Global Prospects offer you a new experience in examining a book.

Eunice Holt:

In this age globalization it is important to someone to receive information. The information will make professionals understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of personal references to get information example: internet, newspapers, book, and soon. You will observe that now, a lot of publisher which print many kinds of book. The particular book that recommended to your account is Aquananotechnology: Global Prospects this publication consist a lot of the information in the condition of this world now. This specific book was represented just how can the world has grown up. The language styles that writer value to explain it is easy to understand. The writer made some exploration when he makes this book. Here is why this book ideal all of you.
