## Review of Radiologic Physics Walter Huda MD

Now revised to reflect the new, clinically-focused certification exams, **Review of Radiological Physics, Fourth Edition**, offers a complete review for radiology residents and radiologic technologists preparing for certification. . This new edition covers x-ray production and interactions, projection and tomographic imaging, image quality, radiobiology, radiation protection, nuclear medicine, ultrasound, and magnetic resonance – all of the important physics information you need to understand the factors that improve or degrade image quality. Each chapter is followed by 20 questions for immediate self-assessment, and two end-of-book practice exams, each with 100 additional questions, offer a comprehensive review of the full range of topics.

### Key Features

- **Mirrors the current clinically relevant focus of the certification exams** – the key information radiologists need to know to perform their clinical duties.
- Brand new, full color illustrations throughout the book enhance the learning experience
- Focuses on the radiological physics of x-rays (projection radiography, fluoroscopy, and CT), as well as nuclear medicine, ultrasound, and MR.
- Includes **only the essential information** needed to understand how images are created, aspects that impact image quality, and factors that affect radiation risks and costs.
- Features **helpful appendices** such as a summary of SI units, radiological units and photometric quantities, and more.
- An **ideal physics review** meant to be used in conjunction with a comprehensive textbook on medical imaging.

Now with the print edition, enjoy the bundled interactive eBook edition, which can be downloaded to your tablet and smartphone or accessed online and includes features like:

- **Complete content with enhanced navigation**
- **Powerful search tools and smart navigation cross-links** that pull results from content in the book, your notes, and even the web
- **Cross-linked pages, references, and more** for easy navigation
- **Highlighting tool** for easier reference of key content throughout the text
- Ability to **take and share notes** with friends and colleagues
- **Quick reference tabbing** to save your favorite content for future use

### **From reader reviews:**

#### **Terry Holmes:**

Nowadays reading books are more than want or need but also be a life style. This reading habit give you lot of advantages. Advantages you got of course the knowledge your information inside the book that improve your knowledge and information. The knowledge you get based on what kind of reserve you read, if you want send more knowledge just go with training books but if you want truly feel happy read one having theme for entertaining including comic or novel. The actual Review of Radiologic Physics is kind of reserve which is giving the reader unstable experience.

#### **Nancy Samuel:**

The publication with title Review of Radiologic Physics includes a lot of information that you can discover it. You can get a lot of help after read this book. This specific book exist new information the information that exist in this reserve represented the condition of the world currently. That is important to yo7u to understand how the improvement of the world. This book will bring you in new era of the glowbal growth. You can read the e-book on the smart phone, so you can read it anywhere you want.

#### **Jerry Goble:**

Why? Because this Review of Radiologic Physics is an unordinary book that the inside of the e-book waiting for you to snap the item but latter it will surprise you with the secret the item inside. Reading this book beside it was fantastic author who all write the book in such incredible way makes the content on the inside easier to understand, entertaining technique but still convey the meaning totally. So , it is good for you because of not hesitating having this ever again or you going to regret it. This excellent book will give you a lot of benefits than the other book get such as help improving your talent and your critical thinking means. So , still want to postpone having that book? If I were you I will go to the book store hurriedly.

#### **Bruce Alexander:**

Playing with family in the park, coming to see the coastal world or hanging out with buddies is thing that usually you might have done when you have spare time, in that case why you don't try matter that really opposite from that. Just one activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Review of Radiologic Physics, you are able to enjoy both. It is very good combination right, you still desire to miss it? What kind of hang type is it? Oh come on its mind hangout people. What? Still don't understand it, oh come on its referred to as reading friends.
