Management Science in Fisheries: An introduction to simulation-based methods

Management Science in Fisheries: An introduction to simulation-based methods

A key goal of fisheries management is to regulate extractive pressure on a resource so as to ensure social, economic and ecological sustainability. This text provides an accessible entry point for students and professionals to management science as developed in fisheries, in order to facilitate uptake of the latest ideas and methods.

Traditional management approaches have relied upon a stock assessment based on existing understanding of resource status and dynamics, and a prediction of the likely future response to a static management proposal. However all such predictions include an inherent degree of uncertainty, and the last few decades have seen the emergence of an adaptive approach that uses feedback control to account for unknown future behaviour. Feedback is achieved via a control rule, which defines a relationship between perceived status of the resource and a management action. Evaluations of such rules usually include computer simulation testing across a broad range of uncertainties, so that an appropriate and robust rule can be selected by stakeholders and managers. The book focuses on this approach, which is usually referred to as Management Strategy Evaluation.

The book is enriched by case study examples from different parts of the world, as well as insights into the theory and practice from those actively involved in the science of fisheries management.

From reader reviews:

Aline Moran:

Book is to be different for every grade. Book for children until adult are different content. To be sure that book is very important normally. The book Management Science in Fisheries: An introduction to simulation-based methods ended up being making you to know about other understanding and of course you can take more information. It is quite advantages for you. The publication Management Science in Fisheries: An introduction to simulation-based methods is not only giving you a lot more new information but also being your friend when you sense bored. You can spend your current spend time to read your e-book. Try to make relationship while using book Management Science in Fisheries: An introduction to simulation-based methods. You never experience lose out for everything should you read some books.

Carson McDonald:

Reading a e-book can be one of a lot of pastime that everyone in the world really likes. Do you like reading book therefore. There are a lot of reasons why people love it. First reading a reserve will give you a lot of new info. When you read a guide you will get new information since book is one of numerous ways to share the information or their idea. Second, looking at a book will make you actually more imaginative. When you reading a book especially fictional works book the author will bring you to definitely imagine the story how the character types do it anything. Third, you can share your knowledge to other folks. When you read this Management Science in Fisheries: An introduction to simulation-based methods, you can tells your family, friends as well as soon about yours reserve. Your knowledge can inspire the others, make them reading a publication.

Loretta Claybrooks:

Is it a person who having spare time in that case spend it whole day by means of watching television programs or just telling lies on the bed? Do you need something totally new? This Management Science in Fisheries: An introduction to simulation-based methods can be the answer, oh how comes? A fresh book you know. You are therefore out of date, spending your time by reading in this new era is common not a geek activity. So what these ebooks have than the others?

Sharon Wilson:

What is your hobby? Have you heard that question when you got learners? We believe that that issue was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. Therefore you know that little person such as reading or as examining become their hobby. You need to know that reading is very important and also book as to be the point. Book is important thing to provide you knowledge, except your own teacher or lecturer. You discover good news or update concerning something by book. Amount types of books that can you take to be your object. One of them is actually Management Science in Fisheries: An introduction to simulation-based methods.
