**Environmental Science, 12th Edition** William P. Cunningham, Mary Ann Cunningham

*Environmental Science: A Global Concern*, Twelfth Edition, is a comprehensive presentation of environmental science for non-science majors which emphasizes critical thinking, environmental responsibility, and global awareness. This book is intended for use in a one or two-semester course in environmental science, human ecology, or environmental studies at the college or advanced placement high school level.

Cunningham and Cunningham have updated much of the data in the 12th edition; updated data on hunger and obesity, waste production, CO<sub>2</sub> emissions, and the effects of the 2010 oil spill are just a few examples.

*Environmental Science: A Global Concern*, Twelfth Edition, provides readers with an up-to-date, introductory global view of essential themes in environmental science. The authors balance evidence of serious environmental challenges with ideas about what we can do to overcome them. An entire chapter focuses on ecological restoration; one of the most important aspects of ecology today. Case studies in most chapters show examples of real progress, and “What Can You Do?” lists give students ideas for contributing to solutions.
