*Singapore's Real Estate: 50 Years of Transformation* documents the transformation and development of the real estate market in Singapore over the past 50 years. This volume is organised around two major themes, and covers issues from the "bricks and mortar" to the capital markets; and from local to international real estate markets. The themes aptly describe how real estate has played an important role in the economic development and growth of Singapore from a third world to a first world country. Written by well-renowned experts with deep academic and practical knowledge of the progress of real estate in Singapore, this book highlights the uniqueness of real estate markets and institutions in Singapore, which have constantly been replicated and adopted in other markets.
