On the Local Structure of Morita and Rickard Equivalences between Brauer Blocks (Progress in Mathematics) Lluís Puig

Brauer had already introduced the defect of a block and opened the way towards a classification by solving all the problems in defects zero and one, and by providing some evidence for the finiteness of the set of blocks with a given defect. In 1959 he discovered the defect group, and in 1964 Dade determined the blocks with cyclic defect groups.

In 1978 Alperin and Broué discovered the Brauer category, and Broué and the author determined the blocks having a nilpotent Brauer category. In 1979, the author discovered the source algebra which determines all the other current invariants, representing faithfully the block – and found its structure in the nilpotent blocks. Recently, the discovery by Rickard that all blocks with the same cyclic defect group and the same Brauer category have the same homotopic category focussed great interest on the new, loose relationship between blocks called Rickard equivalence.

This book describes the source algebra of a block from the source algebra of a Rickard equivalent block and the source of the Rickard equivalence.

From reader reviews:

Latosha Page:

Nowadays reading books be a little more than want or need but also get a life style. This reading routine give you lot of advantages. The huge benefits you got of course the knowledge even the information inside the book that will improve your knowledge and information. The details you get based on what kind of reserve you read, if you want attract knowledge just go with schooling books but if you want really feel happy read one having theme for entertaining for example comic or novel. The actual On the Local Structure of Morita and Rickard Equivalences between Brauer Blocks (Progress in Mathematics) is kind of reserve which is giving the reader unpredictable experience.

Estelle Hicks:

Reading a reserve tends to be new life style on this era globalization. With examining you can get a lot of information that could give you benefit in your life. Using book everyone in this world can easily share their idea. Publications can also inspire a lot of people. Lots of author can inspire all their reader with their story or maybe their experience. Not only the storyplot that share in the ebooks. But also they write about the data about something that you need instance. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors nowadays always try to improve their ability in writing, they also doing some research before they write to their book. One of them is this On the Local Structure of Morita and Rickard Equivalences between Brauer Blocks (Progress in Mathematics).

Benjamin Deloatch:

Your reading sixth sense will not betray you, why because this On the Local Structure of Morita and Rickard Equivalences between Brauer Blocks (Progress in Mathematics) guide written by well-known writer who really knows well how to make book that may be understand by anyone who also read the book. Written inside good manner for you, dripping every ideas and producing skill only for eliminate your own hunger then you still uncertainty On the Local Structure of Morita and Rickard Equivalences between Brauer Blocks (Progress in Mathematics) as good book not just by the cover but also by content. This is one publication that can break don't assess book by its include, so do you still needing a different sixth sense to pick this kind of!? Oh come on your studying sixth sense already told you so why you have to listening to yet another sixth sense.

Justin Davis:

What is your hobby? Have you heard that will question when you got college students? We believe that that concern was given by teacher for their students. Many kinds of hobby, Every person has different hobby. So you know that little person including reading or as looking at become their hobby. You have to know that reading is very important and also book as to be the issue. Book is important thing to add you knowledge, except your own personal teacher or lecturer. You will find good news or update regarding something by

book. Many kinds of books that can you choose to adopt be your object. One of them is this On the Local Structure of Morita and Rickard Equivalences between Brauer Blocks (Progress in Mathematics).
