Markus Rupp, Stefan Schwarz, Martin Taranetz

The Vienna LTE-Advanced Simulators: Up and Downlink, Link and System Level Simulation (Signals and Communication Technology) Markus Rupp, Stefan Schwarz, Martin Taranetz

This book introduces the Vienna Simulator Suite for 3rd-Generation Partnership Project (3GPP)-compatible Long Term Evolution-Advanced (LTE-A) simulators and presents applications to demonstrate their uses for describing, designing, and optimizing wireless cellular LTE-A networks.

Part One addresses LTE and LTE-A link level techniques. As there has been high demand for the downlink (DL) simulator, it constitutes the central focus of the majority of the chapters. This part of the book reports on relevant highlights, including single-user (SU), multi-user (MU) and single-input-single-output (SISO) as well as multiple-input-multiple-output (MIMO) transmissions. Furthermore, it summarizes the optimal pilot pattern for high-speed communications as well as different synchronization issues. One chapter is devoted to experiments that show how the link level simulator can provide input to a testbed. This section also uses measurements to present and validate fundamental results on orthogonal frequency division multiplexing (OFDM) transmissions that are not limited to LTE-A. One chapter exclusively deals with the newest tool, the uplink (UL) link level simulator, and presents cutting-edge results.

In turn, Part Two focuses on system-level simulations. From early on, system-level simulations have been in high demand, as people are naturally seeking answers when scenarios with numerous base stations and hundreds of users are investigated. This part not only explains how mathematical abstraction can be employed to speed up simulations by several hundred times without sacrificing precision, but also illustrates new theories on how to abstract large urban heterogeneous networks with indoor small cells. It also reports on advanced applications such as train and car transmissions to demonstrate the tools' capabilities.

From reader reviews:

Kenneth Wallace:

What do you concentrate on book? It is just for students since they're still students or the idea for all people in the world, what the best subject for that? Just you can be answered for that issue above. Every person has different personality and hobby for each and every other. Don't to be obligated someone or something that they don't wish do that. You must know how great along with important the book The Vienna LTE-Advanced Simulators: Up and Downlink, Link and System Level Simulation (Signals and Communication Technology). All type of book would you see on many options. You can look for the internet options or other social media.

Lizabeth Melgar:

Here thing why that The Vienna LTE-Advanced Simulators: Up and Downlink, Link and System Level Simulation (Signals and Communication Technology) are different and trusted to be yours. First of all looking at a book is good but it depends in the content of it which is the content is as delicious as food or not. The Vienna LTE-Advanced Simulators: Up and Downlink, Link and System Level Simulation (Signals and Communication Technology) giving you information deeper and different ways, you can find any reserve out there but there is no book that similar with The Vienna LTE-Advanced Simulators: Up and Downlink, Link and System Level Simulation (Signals and Communication Technology). It gives you thrill reading journey, its open up your personal eyes about the thing that will happened in the world which is might be can be happened around you. You can actually bring everywhere like in playground, café, or even in your approach home by train. When you are having difficulties in bringing the branded book maybe the form of The Vienna LTE-Advanced Simulators: Up and Downlink, Link and System Level Simulation (Signals and Communication Technology) in e-book can be your option.

Christopher Hill:

The actual book The Vienna LTE-Advanced Simulators: Up and Downlink, Link and System Level Simulation (Signals and Communication Technology) will bring you to the new experience of reading a book. The author style to describe the idea is very unique. In the event you try to find new book you just read, this book very acceptable to you. The book The Vienna LTE-Advanced Simulators: Up and Downlink, Link and System Level Simulation (Signals and Communication Technology) is much recommended to you to study. You can also get the e-book through the official web site, so you can easier to read the book.

Eugene Williams:

Beside this specific The Vienna LTE-Advanced Simulators: Up and Downlink, Link and System Level Simulation (Signals and Communication Technology) in your phone, it could possibly give you a way to get closer to the new knowledge or details. The information and the knowledge you will got here is fresh from

oven so don't be worry if you feel like an outdated people live in narrow commune. It is good thing to have The Vienna LTE-Advanced Simulators: Up and Downlink, Link and System Level Simulation (Signals and Communication Technology) because this book offers for you readable information. Do you often have book but you don't get what it's all about. Oh come on, that would not happen if you have this in the hand. The Enjoyable agreement here cannot be questionable, such as treasuring beautiful island. So do you still want to miss the item? Find this book as well as read it from now!
