João Caramalho Domingues

Lacroix and the Calculus (Science Networks. Historical Studies) João Caramalho Domingues

Silvestre François Lacroix was not a prominent mathematical researcher, but he was certainly a most influential mathematical book author. His most famous work is the three-volume *Traité du calcul différentiel et du calcul intégral*, which is an encyclopedic appraisal of 18th-century calculus that remained the standard reference on the subject through much of the 19th century. This book provides the first global and detailed study of Lacroix's *Traité du calcul*.
