Human Reliability, Error, and Human Factors in Engineering Maintenance: with Reference to Aviation and Power Generation B.S. Dhillon

Of the billions of dollars spent on plant management and operation annually, an estimated 80% of the total amount is spent to rectify the chronic failure of systems, machines, and humans. Although information on human reliability, error, and human factors in engineering maintenance is scattered throughout journals and proceedings, no single resource covers all of these topics within a maintenance safety framework. Consulting different and diverse sources can not only make finding information laborious and time consuming, but also cause delays on the job.

Human Reliability, Error, and Human Factors in Engineering Maintenance with Reference to Aviation and Power Generation provides engineers a tool for meeting the increasing problem of human error. Drawing on a myriad of sources, the book provides quick and easy access to information that can then be immediately applied to actual problems in the field. It includes examples and their solutions to illustrate engineering safety management at work and gives readers a view of the intensity of developments in the area.

The author's clear, concise, user-friendly style breaks the information down into understandable and applicable concepts. This book not only provides up-to-date coverage of the on-going efforts in human reliability, error, and human factors in engineering maintenance, but also covers useful developments in the general areas of human factors, reliability, and error. This information can then be translated into increased maintenance safety that has a positive impact on the bottom line.

From reader reviews:

Charles Thomas:

Book is definitely written, printed, or created for everything. You can understand everything you want by a guide. Book has a different type. To be sure that book is important factor to bring us around the world. Adjacent to that you can your reading ability was fluently. A e-book Human Reliability, Error, and Human Factors in Engineering Maintenance: with Reference to Aviation and Power Generation will make you to be smarter. You can feel much more confidence if you can know about every little thing. But some of you think in which open or reading some sort of book make you bored. It is far from make you fun. Why they might be thought like that? Have you in search of best book or acceptable book with you?

Gary Tawney:

People live in this new day time of lifestyle always try and and must have the spare time or they will get lots of stress from both everyday life and work. So , once we ask do people have free time, we will say absolutely indeed. People is human not really a huge robot. Then we request again, what kind of activity have you got when the spare time coming to you actually of course your answer may unlimited right. Then do you try this one, reading guides. It can be your alternative inside spending your spare time, often the book you have read is usually Human Reliability, Error, and Human Factors in Engineering Maintenance: with Reference to Aviation and Power Generation.

Daryl Church:

In this era globalization it is important to someone to receive information. The information will make a professional understand the condition of the world. The condition of the world makes the information easier to share. You can find a lot of sources to get information example: internet, classifieds, book, and soon. You will observe that now, a lot of publisher which print many kinds of book. The actual book that recommended to your account is Human Reliability, Error, and Human Factors in Engineering Maintenance: with Reference to Aviation and Power Generation this book consist a lot of the information on the condition of this world now. This kind of book was represented just how can the world has grown up. The terminology styles that writer value to explain it is easy to understand. The writer made some analysis when he makes this book. This is why this book appropriate all of you.

Elizabeth Morris:

As a university student exactly feel bored to reading. If their teacher questioned them to go to the library or make summary for some reserve, they are complained. Just very little students that has reading's spirit or real their hobby. They just do what the educator want, like asked to go to the library. They go to there but nothing reading significantly. Any students feel that reading is not important, boring in addition to can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this period of time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's

country. So , this Human Reliability, Error, and Human Factors in Engineering Maintenance: with Reference to Aviation and Power Generation can make you experience more interested to read.
