## **Performance Measurement and Management Control: Global Issues (Studies in Managerial and Financial Accounting)** Antonio Davila

Over the years, the performance measurement and management control conference has grown in number of participants, quality of presentations and reputation, and has attracted leading researchers in the field from North and South America, Europe, Asia, Australia, and Africa. The 2011 theme was directed at global issues, and included the significant challenges of managing and measuring performance within and across different organizational and geographical boundaries, using theoretical, empirical, analytical, experimental, and case-based research to address these topics. In addition to the three plenary sessions, this volume contains some of the exemplary papers that were presented at the 2011 conference; representing a collection of leading research in management control and performance measurement and providing a significant contribution to the growing literature in the area. The editors hope this book will continue the search for additional understanding and development in performance measurement and management control, and provide guidance for both academic researchers and managers as they work toward improving organizations.
