Geared to primary care practitioners, this straightforward, practical guide focuses on evaluation and management of *common* pediatric neurologic conditions. Coverage includes routine disorders such as headaches, ADHD and school problems, autism, seizures, developmental delays, behavioral problems, tics, changes in gait, and dizziness, as well as neurologic conditions encountered in the emergency room. The authors address everyday questions such as how to distinguish serious from non-serious conditions, whether or not to order an EEG or MRI, what to do when a child does not respond to medication, and how to discuss common concerns with parents. Each chapter includes typical case studies.
